Research Title: _____

Research Proponent(s): _____

Date of Utilization: _____

Domain of Utilization:

- ☐ Curriculum Enhancement
☐ Institutional Policy Development
☐ Industry Collaboration
☐ Community Engagement

Abstract <i>(Provide a brief summary of the research in 200 words)</i>	This research examines the effectiveness of nursing interventions in improving the health outcomes of diabetic patients in San Carlos City, Pangasinan. Using a descriptive-correlational design, the study assessed the impact of patient education, lifestyle modification guidance, and continuous monitoring on blood glucose control and self-care practices. Findings revealed that structured nursing interventions significantly enhanced patient compliance, reduced complications, and improved overall quality of life. The study underscores the vital role of nurses in diabetes management and recommends sustained community-based programs to strengthen patient empowerment and disease control.
Key findings <i>(List significant outcomes relevant to utilization)</i>	
Mode of Integration <i>(Specify how the research was applied, e.g. incorporated into courses, policy revisions, industry adoption)</i>	
Stakeholders Involved <i>(List of departments, institutions or external partners involved)</i>	
Stakeholder Feedback <i>(Summarize feedback from students, faculty, policymakers, or industry partners)</i>
